

Friends of Sturt River Landcare Group Inc

Who we are

- Legally incorporated, not-for-profit, community group
- Run by volunteers who live near the Sturt River on the Adelaide Plains, in City of Marion & Holdfast Bay.
- 100% volunteer, no paid staff or contractors.

What we do

Partner with land managers to improve the local environment by 'adopting' reserves and creating biozones along the Sturt River that are cared for by volunteers.

We work cooperatively with individuals and other community groups to re-establish local native vegetation.

We plant only local-native species to improve biodiversity, shade, shelter and help cool our climate.

Regular group activities include planting, weeding, mulching, bush regeneration, seed collection and plant propagation. We are enthusiastic supporters of World Environment Day, National Tree Day, citizen science and environmental education.

We support:

- Oaklands Wetland
- Oaklands Reserve
- Kenton Reserve
- Bob Lewis Reserve
- Stewart Reserve
- Fordham Reserve
- Sturt River Linear Park
- Shannon Ave Reserve

Our volunteers have established more than 110,000 seedlings so far... Join us! Membership is open to community members who agree with our aims for \$10 per year.

Our aims

To maintain, restore and re-establish native biodiversity within the Sturt River drainage corridor, surrounding parks and reserves, wherever possible.

To create a community of people who are willing and able to work together to care for and conserve this area in perpetuity.

These aims to be carried out for the benefit and enjoyment of residents and visitors alike, both now and into the future.
